## eCommerce at MSU

**CASHNet is the only pre-approved e-commerce solution that MSU units may use.** No contract or agreement for payment acceptance may be entered into unless the contract is approved by the Cashier's Office. Units that engage outside organizations to collect payments on MSU's behalf risk having their operation suspended.

**CASHNet is a hosted solution** that moves MSU's transmission/storage of payment card data to off-campus servers. CASHNet is used by over two hundred units on campus, including everything from tuition payments to the MSU Extension Bookstore. MSU and each merchant are still responsible for complying with the Payment Card Industry Data Security Standard (PCI DSS).

**For eCommerce, two options are available to MSU departments:**

- **CASHNet eMarket Storefront stores.** Non-programmers can create an online web storefront for their customers to use. Many units use this for conference registrations, invoices, etc.
- **CASHNet eMarket Checkout stores.** Units with applications may use the checkout option, passing data to CASHNet, and receiving data back from CASHNet to update departmental databases. Tuition, parking and admissions use this feature.

**More Info:**

- The CASHNet at MSU website has lots of info on CASHNet, including sample stores, [training](#), new release info, etc., see [paymentsupport.ais.msu.edu/cashnetatmsu.asp](http://paymentsupport.ais.msu.edu/cashnetatmsu.asp) (MSU IT - University Systems Support).
- Information about PCI, card swipes and other documents related to credit card processing at MSU are available at the Cashier's Office. See [ctlr.msu.edu/CreditCard](http://ctlr.msu.edu/CreditCard) or call (517) 353-5023.
